Talking about learning and learning is talking about something humans exist and thrive on earth until the top of your time. Hintzman [2, pp. 65] learning may be a change that happens within an organism, human or animal, caused by experiences which will affect the behavior of the organism. Thus, within the view of Hintzman, the changes generated by the experience can only be said to be learned when it affects the organism. So, it is often concluded that learning is an activity of daily routines that's lifelong learning, in an endeavor to enhance the standard of oneself so there's a change in both the shape of behavior, knowledge, understanding, and emotional within the individual itself. Good [3, pp. 214] states that grades are symbols (numbers, letters, or words) that illustrate the worth of considerations related to the standard of scholars in achievement during the teaching period. in line with Gagne [3, pp. 215] that the observable appearances as a results of learning are called abilities. So, it is concluded that the results of learning may be a picture of the achievement of the standard of self-learners during the learning process. experiences gained by learners include the cognitive, affective and psychomotor aspects. Learning outcomes have an important role within the learning process because it'll provide an information to teachers about the progress of learners in an effort to realize learning objectives. Successful and not a person in learning thanks to several factors that affect the achievement of learning outcomes springs from within the people who learn and a few are from outside the self. Bahasa Indonesia is that the official language of the Republic of Indonesia Language Unity of Indonesia. Inaugurated its use after the proclamation of Indonesian independence. Anwar [4, p. 13] that "society won't run without communication. Communication during this case (influencing language) may be a vital tool for human society ". **From the above opinion will be concluded that the Indonesian language is that the official language as a method of communication utilized in the association within society to mirror** ourselves because the nation of Indonesia. the goal of Indonesian learning is communication skills in various communication contexts. the goal of Indonesian learning is that students have the flexibility to talk Indonesian well and correctly and might live Indonesian language and literature in accordance with the case and objectives of language and level of experience of school students. Based on some opinions above, it is often concluded that the aim of learning aimed toward the scholars are able to appreciate and also the Indonesian literature and have good and true ability in language.
